Texting to 9-1-1 provides accessibility to the hearing and speech impaired population, provides an alternative to reach help in a dangerous situation when a voice call is not possible, and in our high country where a voice call fails but texting is successful. Only two percent of all 9-1-1 dispatch centers across the nation are capable of receiving a text to 9-1-1 message. LETA911 is pleased to join the 2 percent to open this communication path to our citizens, our visitors, and our community.
